

ENVIRONMENTAL POLICY STATEMENT

Enhanced Health Therapy Services (EHTS) is committed to leading the industry in the prevention of pollution and minimising the impact of its activities on the environment.

The objectives of **EHTS** in the implementation of this Policy specifically include:

- Comply with all relevant environmental legislation.
- Minimise waste by evaluating operations and ensuring that they are as efficient as possible.
- Minimise toxic emissions through the selection and use of our vehicles and the source of our power requirements.
- Actively promote recycling both internally and amongst our customers and suppliers.
- Source and promote a product range to minimise the environmental impact of both production and distribution.
- Protect the health and safety of our employees and surrounding communities and ecosystems.
- Use an accredited program to offset the greenhouse gas emissions generated by our activities.
- Operate a travel policy that takes into account environmental issues as far as reasonably practical and encourages the use of feasible, alternative means of transport.

We will make every effort to ensure that environmental performance is an integral part of **EHTS** performance and of the performance of all of our employees. We will measure and periodically report on our progress in realising these commitments.

Planning, control and verification of our environmental management system in accordance with the uniform principles of the ISO 14001 Standard will achieve this.
